\$399!
SALE!

Please read the instructions

Bad news, your files have been encrypted!

What Happened To This Computer?

All your personal data, photos, videos, work files, including your operating system have been encrypted and can be accessed again if you pay a ransom. You can't access anything on this machine but this screen.

You have **one hour** to pay the prize, otherwise you will no longer be able to decrypt them. Powering off or restarting your computer will also destroy your files.

What Can You Do?

You might be looking for a way to recover your files but don't waste your time. We use an unbreakable encryption so nobody can restore your files without a decryption key.

You can purchase your key using one of the payment methods listed below. You will get a code to paste in the input field and click **Decrypt**. After this you should be restored in a couple of minutes.

Is This Legal?

Someone who has access to this computer has recently installed one of our free applications and agreed for the files to be encrypted by accepting the terms and conditions. This procedure is absolutely legal, we are a certified and awarded company specialized in computer viruses and digital identity theft. We will send you an invoice for your payment.

How Do You Pay?

Send \$399 ⇒ Get a key ⇒ Paste the key below ⇒ Click Decrypt

Your key: **Decrypt**

[INTRO] We can protect our data more efficiently!

Understand what information &
products are sold on dark web markets

Identify the threats

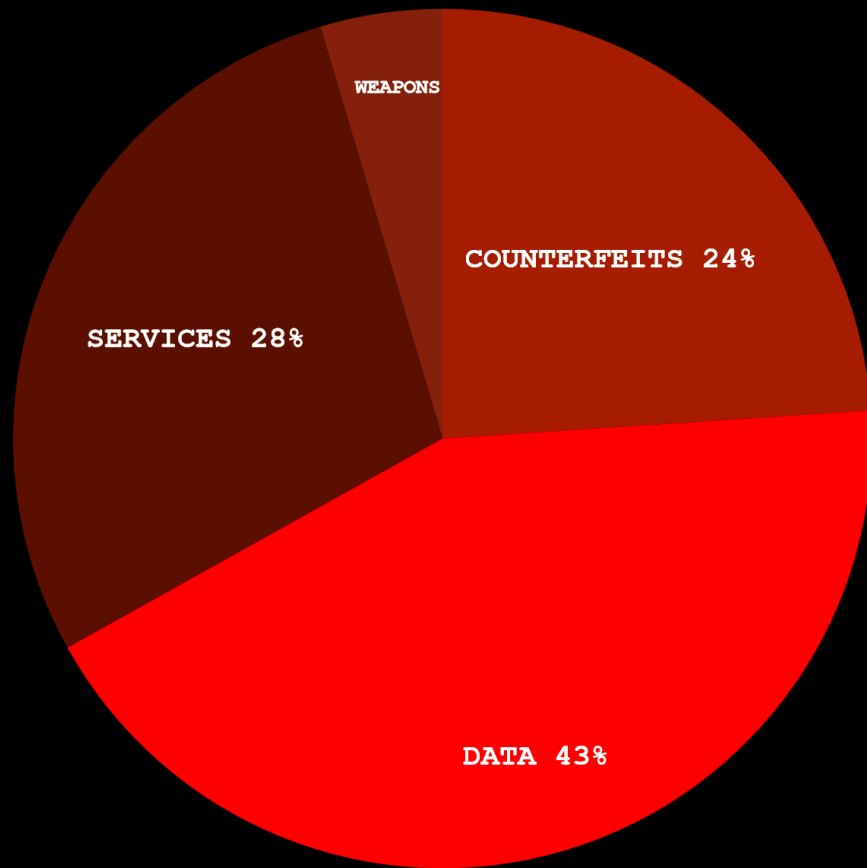

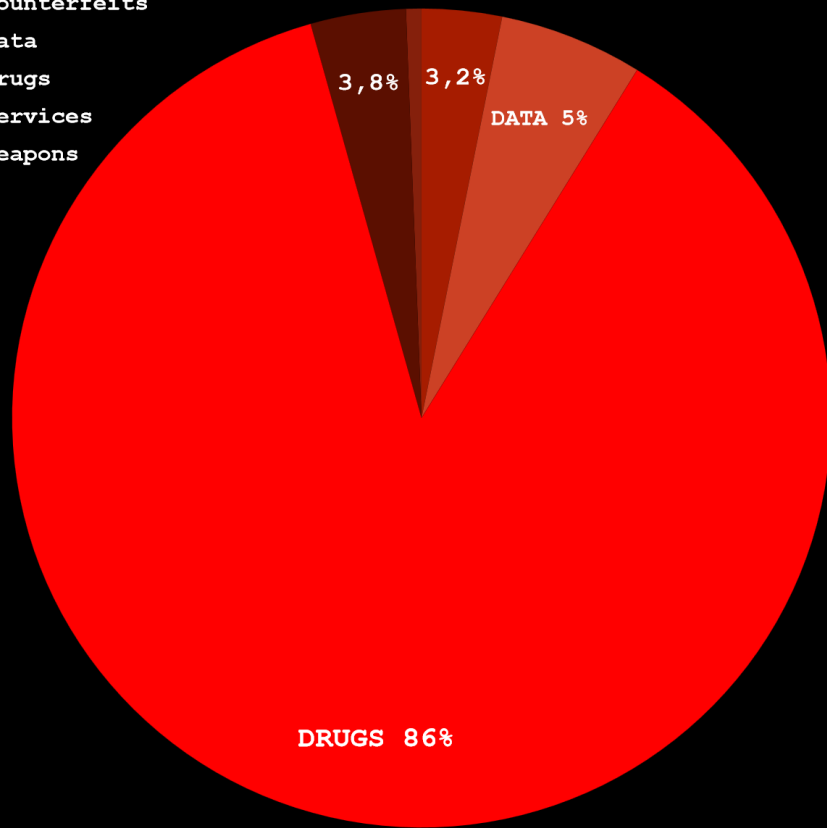

Protect themselves
& conduct countermeasures

Phishing Detection

[DARK_MARKET] The most common items

Email

[TAKE_ACTION]

1/ Create unique & long passwords

2/ Don't forget to update your systems regularly

3/ Limit what you publish publicly

4/ Work only on company's hardware & environments

5/ Ask an expert if you're unsure...
